

Example VirtualPrinter Document

Cropmarks

Select this option if you print to postscript or export to PDF, distance = 2 mm.

Used Colours

Use CMYK colours, do not use Pantone or RGB.

Images

Use CMYK colour mode and a resolution of 300 dpi.

Text margin

(= cyan line)

For a correct design, set the textmargin (distance paper to text) to a minimum distance of 4 mm

Page Size

(= black line)

This marks the size of the paper after cutting. In your programme you can set this with "document setup".

2 mm bleed

(= red line)

If you use Images or coloured elements that "fall off" the page, extent the image or element 2 mm over the paper size, as we need this to cut the paper without white borders on the edge.

Black Filling

If you use "full colour black" set this to 30C/20M/20Y/100B

VirtualPrinter Posters fc/o
